

INFRARED FOREHEAD THERMOMETER

FEATURES AND BENEFITS

Use this non-contact thermometer (no probe required) for three-second temperature readings without physical contact to avoid cross-contamination.

This thermometer recalls last 10 temperature readings for ease of record keeping.

Temperature readings appear on backlit LCD display that changes to one of 3 colors based on results, and an alarm beep that sounds when temperature is over 100°F.

With a battery life up to one year or 6,000 uses, this thermometer is "ready to use out of the box with no probe covers required". 2 AAA batteries included.

Easy to use, one-button operation for measuring in °F/°C.

Durable construction can withstand a drop of three feet.
